A Source of Renewable Energy

A properly designed Biogas Recovery System yields many benefits. In addition to environmental protection, Shand & Jurs equipment helps to improve the infrastructure of America. If utilized correctly, the gases from the digester can provide plants with an alternate source of renewable energy. The plant realizes huge savings by, essentially, powering themselves. In some cases, the excess energy can be sold and the plant can make a profit.

Shand & Jurs products are **Made In America**, and have been in the gas control industry for over 85 years.

BIOGAS SHAND & JURRS

MULTIPLE DIGESTER GAS Q SYSTEM

- A** 94020: PRESSURE & VACUUM RELIEF VALVE with 94309 FLAME ARRESTER and 97190 3-WAY VALVE ASSEMBLY
- B** 95021: GAUGE HATCH
- C** 94225: EMERGENCY VENT & MANHOLE COVER (PRESSURE & VACUUM)
- D** 95210: MANHOLE COVER
- E** 97186: VIEW PORT
- F** 92021: COVER POSITION INDICATOR w/ MCG 2000MAX TRANSMITTER
- G** 97120: SEDIMENT TRAP
- H** 97100: ELECTRIC ACTUATED DRIP TRAP
- I** 97140: FLAME TRAP ASSEMBLY

- J** 97100: MANUAL DRIP TRAP
- K** 97220: CHECK VALVE
- L** 97160: PRESSURE RELIEF and FLAME TRAP ASSEMBLY
- M** 94160: PRESSURE RELIEF VENT
- N** 97200: FLAME CHECK
- O** 97300: WASTE GAS BURNER
- P** 97400: WELL-TYPE MANOMETER
- Q** 97180: FOAM SEPARATOR
- R** 97126: GAS PURIFIER
- S** 97110: AUTOMATIC DRIP TRAP
- T** 97177: DOUBLE PORT REGULATOR
